# THE GREAT GAME OF POLITICS

By FRANK R. KENT

## Mr. Stassen Advances

Washington, Nov. 15.—  
TWO THINGS recently have de-  
finitely enhanced the prospects of  
Mr. Harold Stassen, of Minnesota,  
coming the Republican candidate  
for President in 1948. In the two  
and a half years before the conven-  
tion meets there is plenty of time  
for the picture to change. But at  
this moment the enhancement is  
such as to make Mr. Stassen seem  
many the most likely nominee.

—o—

THERE is a better Republican  
available no one has pointed him  
out. That Mr. Stassen has presi-  
dential aspirations, of course, has  
been known since 1944 when he  
went before the convention in  
Chicago. Since then he has  
grown in popularity and stature.  
His navy service during the war  
and his participation in the San  
Francisco conference as a delegate  
have contributed to strengthening  
political assets and build him  
as a national figure.

—o—

THE FRESH developments that  
have helped him are interesting be-  
cause the first is one with which he  
has nothing to do and the second  
with which he had everything to  
do. The first was the overwhelming  
defeat of the Republican candi-  
date for Mayor in New York—  
George Goldstein. This has been  
generally interpreted as a setback  
for Governor Dewey, for two rea-  
sons. One is that his selection of  
Goldstein, a former Tammy  
Democrat, was a bad example  
being overset in politics. It  
is a piece of political strategy  
backfired damagingly. It has  
made it less likely that Governor  
Dewey will be re-elected Governor  
next year and if he is not re-elected  
will not figure importantly in  
1948 convention.

—o—

US, entirely through his own  
effort, Mr. Stassen's most potential  
asset for the nomination has taken  
shape. Mr. Stassen has automatically  
canceled, 11-4s, of course, possi-  
ble. Governor Dewey may recover and  
next year. But his chances  
are lessened and that helps Mr.  
Stassen. The other development  
which Mr. Stassen deserves full  
credit was his own New York  
victory.

# ATOMIC BOMB SECRET TO BE SAFEGUARDED UNTIL WORLD PEACE

By Robert G. Nixon

(I. N. S. Staff Correspondent)

WASHINGTON, Nov. 15.—(INS)—  
President Truman announced today  
in a joint communique with the  
Prime Ministers of Great Britain  
and Canada, that the atomic bomb  
secret will be safeguarded until  
world peace is guaranteed.

The joint communique asserted  
that preparatory to that develop-  
ment there would be an exchange  
of scientific knowledge for indus-  
trial use of atomic energy if other  
countries reciprocate in kind with  
their full scientific knowledge of  
other weapons.

Mr. Truman, Prime Ministers At-  
lee of Britain and MacKenzie King  
of Canada, set up an international  
commission to study the further  
uses and development of atomic  
energy for peaceful pursuits and  
to safeguard the world against its  
future use for destructive means.

## Police Arrest Pair On Theft Charge

Detainers have been filed against  
two men giving Trenton residences.  
Both men are wanted by the Bucks  
County authorities.

Their names are given as An-  
thony J. Campanero, 18, and Ber-  
nard P. Barna, 22. They were ar-  
rested by the New Jersey State Po-  
lice at Somersville, N. J., at 1:30  
a. m. yesterday.

According to Bucks County De-  
tective Anthony Russo and State  
Trooper Kutney, Langhorne Bar-  
racks Penna. State Police, when  
the men were taken into custody a  
32 caliber revolver was found in  
their car. This it is alleged was  
stolen November 7th from the resi-  
dence of George L. Bliss, Lower  
Makefield Township, Bucks County.  
A ring reported stolen from the

## DON'T BE LATE!

The Courier reserves the  
right to reject copy for display  
advertising which is received  
later than two days previous  
to the day of publication. This  
rule is now effective and will  
be in force until after January  
1st and may be extended.

All display advertising copy  
for insertion in The Bristol  
Courier must be at the Courier  
office not later than 12 o'clock  
noon, two days previous to day  
on which the advertising is to  
appear. We reserve the right to  
reject copy received after the  
designated time.

This rule is made necessary  
in order to give the mechanical  
department ample time in which  
to set the advertisement, and  
properly illustrate it. It is hoped  
that advertisers will co-operate  
and make reservations for  
space desired, and furnish their  
copy on time.

Copy will not be accepted  
after the expiration of the  
deadline announced above.

# INFLATION IS HERE

The Truman administration is kidding the American  
people on the subject of inflation.

"Hold the line," says Bowles. "Prevent inflation  
with 60,000,000 jobs," says Wallace. "Global free trade  
will prevent inflation," insists the State Department.  
Every other New Dealer with a bill of goods to sell uses  
the same pretext. Truman himself used it as the excuse  
for his new spend-borrow proposals.

The trouble with these arguments is that inflation  
is not something to be feared in the future, but to be  
coped with in the present. It is here. We are well along in  
the spiral. The fire has started—it's too late to buy fire  
insurance; what we need is a bucket of water.

In the public's mind, inflation is linked with prices.  
If prices are rising, that is assumed to be an unfailing  
barometer.

That is why the OPA is so important to Truman's  
plans. So long as enough prices can be pegged, regardless  
of how, on enough commodities to make an "index" to  
argue that the cost of living is not rising, he has a chance  
to go ahead with the pretense no inflation exists.

This ought to fool no one. Every housewife knows  
that she pays much more for her weekly groceries, for  
clothing, and for nearly everything else she buys, than  
two years ago, or four, or ten.

But the pegged prices themselves conceal the truth  
rather than reveal it. In addition to what you pay the  
grocer for a dozen eggs, you are paying an additional  
amount through your taxes, and assuming the debt of a  
still further amount of money the government is borrow-  
ing to hold the price at the fixed level.

It would take an Einstein to figure out what a dozen  
eggs, or a loaf of bread, or a pound of bacon, really costs  
the consumer.

The rapid and steady rise in the actual cost of neces-  
sities is the principal reason for the present rash of strikes  
demanding wage increases. The wage-earners would be  
just as well off—or better—if they demanded that the  
government reverse the inflationary tide of rising prices;  
but that is too complicated to be attractive.

Wages themselves are a good measure of inflation.  
During recent years there have been many large increases  
without corresponding increases in per-man production.  
Now, on the pretext of "preventing inflation" the Truman  
administration appears to be backing the same inflationary  
program—higher wages for the same production.

Other evidences of inflation are on every hand.  
Million-dollar days at race tracks have become a common-  
place. That is a bad sign. It means that money is burning  
holes in pockets—many of those who have it want to get  
rid of it; for a good time if nothing else occurs to them.

Stock prices on the New York market continue to  
climb. They have risen about 10 per cent since V-J day,  
according to recent tabulations. In that period, industrial  
production has dropped about one-third. Industrial earn-  
ings are down, the outlook is gloomy—yet stock prices  
rise; what more clear evidence is needed that inflation is  
well under way?

How far has it gone? The government has meddled  
too much with our economy, and made facts too hard to  
learn, to allow a definite answer.

Real estate, less controlled than other commodities,  
is up about 50 per cent in four years and nearly 100 in

## BOROUGH BONDS SELL ABOVE PAR VALUE

### Former Senator Joseph R. Grundy is The Highest Bidder for Issue

### INTEREST 1½ PERCENT

The \$31,000 general obligation  
bond issue of Bristol Borough for  
the purchase of land and rights-of-  
way for the purpose of water sys-  
tem improvement, was sold for  
\$34,541 above par with an interest  
rate of one and one-half percent bid.  
The entire issue was purchased  
by former Senator Joseph R.  
Grundy.

The bonds are in \$1,000 denom-  
inations and the first will be pay-  
able December 1, 1947.

finance committee reported there  
were two bids received, that of Sen-  
ator Grundy being the highest. The  
other bid was submitted by the Far-  
mer's National Bank of Bucks Coun-  
ty, which bid par for the issue. The  
bid of Senator Grundy nets the bor-  
ough \$34,541 above the par value.

The sale of the bonds to Mr.  
Grundy was approved and a resolu-  
tion was adopted fixing the rate of  
interest at one and one-half per cent.

## MASS CHEST X-RAY IS CONDUCTED LOCALLY

### Over 1,000 Employees of Fleetwings, Inc., Plants 1 and 2, Included in Plan

### IS CONCLUDED TODAY

Kaiser Cargo, Inc., Fleetwings  
Division (Plants 1 and 2), is con-  
ducting a mass chest X-ray of over  
1,000 of its employees through the  
facilities offered by Bucks County  
Tuberculosis and Health Society,  
located at 10 West Oakland avenue,  
Doylestown. This is the first time  
the plant has done this sort of  
thing, and both labor and manage-  
ment feel that "it is an important  
forward step in protecting the  
health of the workers." The activi-

## "Care is Costly" Is Reminded in Bond Drive

Reminding that "care is costly"  
the committee in charge of the Vic-  
tory Bond drive urges every person  
to do his part in purchase of bonds,  
so that adequate care can be as-  
sured the wounded and maimed  
veterans of World War II.

Not only is the costly hospital  
care thus taken care of—through  
sale of bonds—but likewise must-  
ering-out pay, education for the  
young women, and young men who  
have so nobly served their country,  
transportation to their native land,  
and countless other things.

"Help pay for the peace" and  
care for the costs of the needed  
items for those who were ready to  
give all, is the plea of the workers  
who urge further "Buy your Vic-  
tory Bond now."

### THREAT TO PEACE

American newspapers are full of stories about the atomic bomb. Press wires carry reports of plans being made in Congress for control of this weapon, scientists and statesmen sound off in some part of the country every day. Nearly every citizen has a definite opinion as to what should be done to save the world from instant and final destruction.

Without minimizing unduly the concern which is being expressed on this vital question, there is another threat to peace that appears to many observers much more immediate and pressing. That is the danger of involvement in some definite manner in the affairs of China.

As a matter of formal status, the Chungking government is at present a party to a twenty-year mutual peace pact with Moscow, the document having been signed shortly before the Japanese surrender. There is no record of any formal intervention by either American forces or those of Russia in the events which have taken place within China since the surrender, but there have been multiplied indications that where Americans could favor Chungking, this has been done. Or if the Russians could retire from a position in North China in such manner as would give the Chinese communists an advantage, they have done so.

The danger is, as a great and prolonged civil war in China apparently is getting under way, of a creeping sort of participation by both the United States and Russia. The civil war in Spain, growing out of Franco's assault against the Communist-controlled government of that country, began under auspices not dissimilar with Italy and Germany backing Franco and the Russians backing the so-called republicans.

No observer of the manner in which these international matters progress can ignore the possibility of American involvement in the Chinese situation, and no one can doubt that there is only one way in which it could wind up.

There is no doubt that the danger under discussion here would exist regardless of whether there had been a new bomb perfected or not. History is replete with a multitude of examples in which strong powers have finally found themselves at each others' throats through sponsoring the causes of weaker ones. Realities of the day should temper considerably any concern about the overwhelming importance of the issues being raised on the atomic bomb question.

Washington denies reports State Department officials will be sent to Japan to tell General MacArthur what to do. That would have been something for the book.

The gesture of Sioux Indians in sending President Truman a peace pipe seems to have been ignored by strikers.

Nothing has been worked out of those Nazi war criminals about the wealth they are supposed to have cached in other lands.

### CAN'T KEEP GRANDMA IN HER CHAIR

She's as Lively as a Youngster—Now her Backache is better

Many sufferers relieve nagging backache quickly, once they discover that the real cause of their trouble may be tired kidneys. The kidneys are Nature's chief way of taking the excess acids and waste out of the blood. They help most people pass about 3 pints a day.

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with smarting and burning sometimes shows there is something wrong with your kidneys or bladder.

Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully by millions for over 40 years. Doan's give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

manlike utterance. It stamped him unmistakably as a man of presidential size. Though he took a broad and elevated view of this great problem, his plan was an exceedingly practical one and his recommendations were concrete, clear and detailed.

NOT THE least attractive thing about the speech was that, while Mr. Stassen obviously had given a lot of time and study to his plan of placing control of the bomb definitely on the world level, he did not insist that his plan is the best, or the only one, or cannot be improved. With an engaging modesty he offered it for discussion, expressed his conviction that here is no real alternative to world control, but evidenced an open mind to suggestions.

OTHERS HAVE since spoken along similar lines—Senator Ball, of Minnesota, for one. Yet no one else has presented a clearer analysis or a sounder idea. Undoubtedly, the New York election results have helped Mr. Stassen politically, but he has helped himself a good deal more by the clarity, force and frankness with which he has discussed this most vital of all policies. Or at least he should have. Perhaps, the Messrs. Truman, Attlee and Mackenzie King will evolve

**Only one side to our railroad tracks**

Folks who are better off in our town live on the west side of the railroad tracks. We've got a lake there, and the local park, and some real nice land.

There used to be a phrase "from the wrong side of the tracks." It meant what you think ... but you don't hear it any more. Not since Charlie Jenkins came home with the Purple Heart, and Willie Wells got the Silver Star. There isn't any "wrong side" of the railroad tracks now!

And that change is going on all over America ... where our

heroes have come from obscure homes ... and greatness has overshadowed wealth and ghastly low social definitions.

From where I sit, it all comes down to tolerance ... tolerance for what a man is and does ... tolerance for his freedom and opinions, whether he's rich or poor, likes beer or cider, Shakespeare or the comic section. It's a great thing—tolerance!

ity which commenced yesterday will conclude today.

The X-raying is being done on the premises of the plant. Very little time is necessary to take the chest X-ray of each individual, so that few work hours are lost, it is said.

Arrangements for the mass X-ray were made on October 31 at a meeting between Fleetwing officials, Union officials, and Mrs. Emma C. Stover, Doylestown, executive secretary of the County Tuberculosis Society.

"It is hoped that other plants throughout the county will follow the lead taken by Fleetwing in protecting their employees from tuberculosis by means of mass chest X-ray," states Mrs. Stover.

## INFLATION IS HERE

Continued from Page One

ten, on the basis of various government compilations covering residential and farm sales.

Gold reserves in ratio to currency in circulation would be one of the best yardsticks—but no one appears to know just how much of our gold has been sent or promised to foreign nations, nor how much of our own and our Allies' invasion currency we are going to have to redeem.

Roughly, on the basis of gold it would take four present dollars to equal one of those in circulation before the New Deal. The Republicans bequeathed President Roosevelt a dollar which was redeemable for 100 cents worth of gold. Now, thanks to Roosevelt devaluation and to slippery "reverse lend-lease" practices, the gold content is down to less than 25 cents.

Inflation is here—and the cause is obvious enough: New Deal financing.

The physical resources of this nation are little changed in ten years; but in that time the national debt mortgage on those resources has risen from \$20,000,000,000 to \$300,000,000,000.

That is direct inflation—borrowing and spending fifteen times as much on the same assets.

Inflation has ruined more nations than war, pestilence or famine. Yet it continues to fascinate the unwary. There is something about the ideas that "we can always print more money" and "cheaper money makes debts easier to pay" that blinds the people of many nations to the fact that the loss comes out of their own pockets.

The present cult in America is to assume that we can avoid the evils of inflation by pretending it doesn't exist.

But it is here, deadly as a plague; unless it is acknowledged, confronted and halted by the only possible process—that of balancing the national budget—it will do to us what it has done to every other race which tried it: bankrupt us as a nation and impoverish us as a people.

While the plans are as yet in a preliminary stage, the building which is proposed will be of brick construction, two stories in height, and 70x90 feet. It is the desire of the committee to erect a building such as those in whose memory it is to be built would have been proud. There was much enthusiasm at the meeting last evening, and it was announced that committees will later be named to solicit funds and to otherwise further this very large and important project for the community. Another meeting will be held Tuesday evening, November 20th, at 7:30 o'clock, in the Black-

## Atkinson Post Marks The Armistice Season

DOYLESTOWN, Nov. 15—Celebrating the 27th anniversary of the signing of the armistice, Albert R. Atkinson, Jr., Post No. 210, American Legion, held its annual banquet at the Doylestown Country Club with 175 in attendance.

Included among the guests were a large number of World War II veterans.

The event was featured by the serving of a turkey dinner, short talks, and a floor show which was arranged by Post Commander Russell B. Gulick, who served as master of ceremonies.

Greetings were extended by Albert R. Halldeman, commander of Doylestown Post, No. 175, V. F. W.; Dr. Charles P. Freeman, formerly chaplain of the post, and the Rev. George M. Whitenack, who spoke upon the importance of World War I and World War II veterans co-operating for a common cause.

Another guest was George S. Hotchkiss, editor of "The Intelligencer."

Past Commander Gulick also introduced the new commander, George W. Miller, who extended a welcome to the members and guests.

Tells Boys and Men to Follow Rules in "Baseball Game of Life"

HULMEVILLE, Nov. 15.—Presenting an enthusiastic address to men and boys here on the value and joy derived from sports, baseball in particular, Ira Thomas, scout for the Philadelphia Athletics baseball club, reminded them: "Don't forget the baseball game of life. If you follow the rules and regulations, when you reach Home you will not be asked if you won or lost, but how you played the game."

Mr. Thomas was the speaker at the athletic rally arranged by Samuel J. Illick and conducted in the social hall of Neshaminy Methodist Church last evening. In the major league as both player and scout for the past 39 years, he brought a wealth of experience, not only in sports but in true sportsmanship on and off the field.

Thomas, who now serves as scout for the Philadelphia Athletics, Connie Mack's American League baseball club, sparkled with humor, and many questions were put to him following his talk. He told of how he had watched the development of many a baseball star, mentioning names of numerous ones who have helped make baseball history. As he mentioned the "poor showing" of the Athletics during the past few years, Thomas at the same time reminded how Mack had lead the team to nine American League championships. "And at the age of 52 he is fighting to build up a great baseball team," stressing Mack's love of the game and his interest in development of boys and young men. Mr. Thomas added that "Money never played a part in Connie Mack's life."

Giving some attention to the history of the sport, the speaker told how Babe Ruth's home runs revolutionized the game, the turn being made from the bunt and run idea which had prevailed to the desire for more home-run hitters. Going down the long list of stars—Al Simmons, George Earnshaw, Mickey Cochrane, and others—Mr. Thomas named prices paid for star players, telling how Mack had built up a

championship team. He said that baseball players are found on sand lots and in colleges. "A good athlete coming out of high school usually wants to continue to college." At this point the scout told how contracts are often signed, with huge sums paid the young men, the funds thus helping them with their college careers. Mentioning Tommy Burns, he told how Burns applied at Wake Forest College, informing officials there he had no money, but "a good arm for baseball and ability for basketball." Liking his spirit Burns was given a chance by college officials. "And after a year at Wake Forest I was ready to pay him a good price to sign a contract. Some day this young man who is now in the army, will make a great pitcher."

The group was told that "Baseball affords a wonderful opportunity for boys. It is a great builder of character." Thomas told of rules laid down by the team with which he was affiliated as a young man—no tobacco or intoxicating liquors might be used, and late hours being forbidden. "Because of the character of some promising young athletes their lives have been cut short. I recall one who took his first drink 'just for fun.' Today he walks the streets unkempt; lost to his family circle, and his mother dying of a broken heart. Take home with you the lesson of that boy. When called upon to take a drink 'just for fun' have the courage to stand on your two feet and say 'No,' was the advice of the one who attributes his success in the baseball realm to the fact that he has always refrained from tobacco and intoxicants. The gathering was much interested in facts concerning Mack and the teams he had led to four American League and three world championships.

"If you want to be great in any walk of life you've got to live clean. And I don't know a better place outside the church to build up fine character than on the baseball field," continued Mr. Thomas as he invited the entire group to be guests of Connie Mack at a game at Shibe Park next summer.

Group singing, including "Take Me Out to the Ball Game," the national anthem, etc., was led by Ernest Gamble, of Langhorne, with Keith Rosser, of Bristol, at the piano. The benediction was by the Rev. Richard R. Gay, pastor of the church. Refreshments were arranged.

Mr. Illick, in addressing the audience briefly, informed that it has always been his belief that every boy should have a chance in life. He stated that he had long had such a program in mind, and had arranged such in tribute to the memory of his wife and son. A former burgess of Hulmeville, Mr. Illick has made Hulmeville his home for over 50 years.

# BENSALEM OWLS WILL TRY TO WIN OVER ST. FRANCIS

Cornwells Heights Boys Are Eager To Chalk Up 4th Straight Win

## TO PLAY TOMORROW

Bensalem Boys Hit Their Stride After Losing The First Five Games

Trying for its fourth straight win, the Bensalem Owls will meet the St. Francis Vocational School eleven tomorrow afternoon in an inter-sectional game tomorrow afternoon on the Cornwells Heights gridiron. After losing its first five games, the Owls have broke into stride and defeated Southampton, Fallsington, and George School, and while chalking up these triumphs, the Bensalemites have kept their goal line uncrossed.

The boys of John Bixler have scored in every game this season and have rolled up 114 points. Its foes have scored the same number of points but 76 of these were amassed in the first two games when Bixler lost several of his first stringers because of injuries.

Tomorrow's tilt may turn out to be a personal battle between "Jack" Hansen, star backfield ace of the Owls, and Don Oppold, triple-threat ace of the Edgington team. Both Oppold and Hansen are among the topnotch scorers in the lower section of the county.

However, Hansen has received plenty of help from his mates while Oppold is the only experienced players in the St. Francis lineup and in order to guide his mates usually plays the entire game.

Illick has made Hulmeville his home for over 50 years.
